Volume 11 1969

Table of Contents

592 Corrections to Volume 8 and Volume 10

Nucleic Acids and Protein Synthesis — Biochemical Genetics — Morphogenesis

7 F. Gonano and C. Baglioni: Initiation of Hemoglobin Synthesis with Rabbit and *E. coli* tRNA in a Reticulocyte Cell-Free System

12 P. Fellner: Nucleotide Sequences from Specific Areas of the 16S and 23S Ribosomal RNAs of *E. coli*

43 J. L. Darlix, A. Sentenac, A. Ruet, and P. Fromageot: Role of RNA Polymerase Stimulating Factor on Chain Initiation

135 H. Fukuhara: Relative Proportions of Mitochondrial and Nuclear DNA in Yeast under Various Conditions of Growth

148 M. Herzberg, M. Revel, and D. Danon: The Influence of Ribosomal Factors during the Maturation of Reticulocytes

218 C. M. Jacque, M. L. Harpin, and N. A. Baumann: Brain Lipid Analysis of a Myelin Deficient Mutant, the "Quaking" Mouse

296 J. Koch: The Cytoplasmic DNAs of Cultured Human Cells

305 B. Öberg and L. Philipson: Replication of Poliovirus RNA Studied by Gel Filtration and Electrophoresis

395 G. G. Brownlee and F. Sanger: Chromatography of ^{32}P-Labelled Oligonucleotides on Thin Layers of DEAE-Cellulose

405 M. Wilcox: γ-Glutamyl Phosphate Attached to Glutamine-Specific tRNA. A Precursor of Glutaminyl-tRNA in *Bacillus subtilis*

419 F. Amaldi, D. Giacomoni, and R. Zito-Bignami: On the Duplication of Ribosomal RNA Cistrons in Chinese Hamster Cells

Protein Chemistry — Enzymology — Physical Chemistry

37 G. H. Beaven, W. B. Gratzer, and H. G. Davies: Formation and Structure of Gels and Fibrils from Glucagon

49 S. Mörikofer-Zwez, M. Cantz, H. Kaufmann, J. P. von Wartburg, and H. Aebi: Heterogeneity of Erythrocyte Catalase. Correlations between Sulfhydryl Group Content, Chromatographic and Electrophoretic Properties

58 R. J. S. Duncan and K. F. Tipton: The Oxidation and Reduction of Glyoxylate by Lactic Dehydrogenase

62 B. Robert and L. Robert: Determination of Elastolytic Activity with ^{125}I and ^{131}I Labelled Elastin

73 M. Bühner and H. Sund: Yeast Alcohol Dehydrogenase: —SH Groups, Disulfide Groups, Quaternary Structure, and Reactivation by Reductive Cleavage of Disulfide Groups

89 A. Röder und E. Bayer: Elektronenspinresonanz-Untersuchungen an Hämin-Mercaptan-Komplexen

97 P. Wunderwald and H. Eggerer: ^{18}O-Studies with Citrate Synthase and Malate Synthase

106 G. Noat, J. Ricard, M. Borel et C. Got: Étude directe, par dialyse sur Sephadex G-25, de la formation d'un complexe entre l'hexokinase de levure et ses substrats

122 J. Bertram and K. Krisch: Hydrolysis of Vitamin A Acetate by Unspecific Carboxylesterases from Liver and Kidney

140 F. Laszlo and B. R. Olsen: Cyanogen Bromide Peptides from the α1-Chain of Cod Skin Collagen

154 J. P. Baker and B. R. Rabin: Effects of Bromopyruvate on the Control and Catalytic Properties of Glutamate Dehydrogenase

170 F. Franěk, B. Keil, and F. Šorm: Amino Acid Sequence of a 22-Residue Section from the Variable Part of Pig Immunoglobulin λ-Chains

179 W. H. Bannister and E. J. Wood: Effect of Photooxidation on Human Caeruloplasmin

201 J. H. Straus, A. S. Gordon, and D. F. H. Wallach: The Influence of Tertiary Structure upon the Optical Activity of Three Globular Proteins: Myoglobin, Hemoglobin and Lysozyme

213 R. Staib, R. Thienhaus, U. Ammedick und W. Staib: Über die Substrat- und Hormoninduktion der Tryptophan-Oxygenase in der isoliert perfundierten Rattenleber

261 J. Leclerc, A. Martinage, Y. Moschetto, and G. Biserte: A Comparative Study of Histone Fractions F2(a)1 and F2 (a)2

267 M. Dautrevaux, Y. Boulanger, K. Han et G. Biserte: Structure covalente de la myoglobine de cheval

278 M. Kaminski, F. Falcoz-Kelly, P. Truffa-Bachi, J.-C. Patte, and G. N. Cohen: The Antigenic Independence of the Three Aspartokinases of *Escherichia coli* K 12

316 J. Knappe, J. Schacht, W. Möckel, Th. Höpner, H. Vetter, Jr., and R. Edenharder: Pyruvate Formate-Lyase Reaction in *Escherichia coli*. The Enzymatic System Converting an Inactive Form of the Lyase into the Catalytically Active Enzyme

341 J. A. Forrester, R. Arnold, and G. Ruhenstroth-Bauer: Isolation of an Ionic Strength Dependent Cell Agglutinin from Bovine Seminal Plasma

347 S. H. Yu and T. Viswanatha: α-Chymotrypsin-Catalyzed Hydrolysis of *N*-Furylacryloyl-Tyrosine Derivatives

360 D. Cavallini, C. Cannella, E. Barboni, A. Fiori, and M. Marcucci: Interaction of Cysteamine Oxygenase with o-Phenanthroline

386 J. Nakano, E. Änggård, and B. Samuelsson: 15-Hydroxy-Prostanoate Dehydrogenase. Prostaglandins as Substrates and Inhibitors

424 S. V. Shlyapnikov and M. Y. Karpeisky: On Carbanion Formation in the Process of Enzymatic Transamination

427 B. Green, R. B. Homer, and (in part) G. R. McDonough: The dAMP-Ag^+ Complex and the Solubilization of Benzo[a]pyrene

435 K. H. Winterhalter, N. M. Anderson, G. Amiconi, E. Antonini, and M. Brunori: Functional Properties of Hemoglobin Zürich

472 J. G. G. Schoenmakers, J. J. T. Gerding, and H. Bloemendal: The Subunit Structure of α-Crystallin. Isolation and Characterization of the S-Carboxymethylated Acidic Subunits from Adult and Embryonic Origin

482 E. Der Terrossian, L. A. Pradel, R. Kassab, and N. V. Thoai: Comparative Structural Studies of the Active Site of ATP-Guanidine Phosphotransferases. The Essential Cysteine Tryptic Peptide of Arginine Kinase from *Homarus vulgaris* Muscle

491 M. Wilchek and M. Gorecki: Affinity Chromatography of Bovine Pancreatic Ribonuclease A

495 E. W. Johns and J. H. Diggle: A Method for the Large Scale Preparation of the Avian Erythrocyte Specific Histone F2C

503 P. J. Anderson, I. Gibbons, and R. N. Perham: A Comparative Study of the Structure of Muscle Fructose 1,6-Diphosphate Aldolases

510 D. Pantaloni, et P. Dessen: Glutamate déshydrogénase. Fixations des coenzymes NAD et NADP et d'autres nucléotides dérivés de l'adénosine-5′-phosphate

520 J. Janin and G. N. Cohen: The Threonine-Sensitive Homoserine Dehydrogenase and Aspartokinase Activities of *Escherichia coli* K12. A Study of the Allosteric Equilibrium

530 J. Janin and M. Iwatsubo: The Threonine-Sensitive Homoserine Dehydrogenase and Aspartokinase Activities of *Escherichia coli* K12. Relaxations of the Allosteric Equilibrium

Cellular Biochemistry and Metabolism

1 H. Puchinger und Th. Wieland: Suche nach einem Metaboliten bei Vergiftung mit Desmethylphalloin (DMP)

68 R. M. Landin, Y. Moulé, and P. Gaye: Labeling of α-P of Nucleoside Triphosphates by *in vivo* Incorporation of ^{32}P in Rat Liver

80 P. Arese, A. Bosia, and L. Rossini: Short-Term Effects of Calcium, Potassium, and of Ouabain on Metabolite Levels in the Frog Heart *in vivo*

93 W. Kaiser and F. L. Bygrave: Stimulation of Phospholipid Synthesis in Isolated Rat Liver Mitochondria after Treatment *in vivo* with Tri-Iodothyronine

113 A. Larsson: Ribonucleotide Reductase from Regenerating Rat Liver

127 J. Del Boca and J. P. Flatt: Fatty Acid Synthesis from Glucose and Acetate and the Control of Lipogenesis in Adipose Tissue

175 D. Seiler und E. Kuhn: 20,25-Diazadehydrocholesterolester aus den Vesikeln des sarkoplasmatischen Reticulum von Ratten nach peroraler Gabe von 20,25-Diazacholesterol

183 K. J. Hittelman, O. Lindberg, and B. Cannon: Oxidative Phosphorylation and Compartmentation of Fatty Acid Metabolism in Brown Fat Mitochondria

193 S. Orrenius, A. Berg, and L. Ernster: Effects of Trypsin on the Electron Transport Systems of Liver Microsomes

225 J. Camus, M.-C. Vandermeers-Piret, C. Wodon et J. Christophe: Activité de treize enzymes du métabolisme intermédiaire, dans le foie du jeune rat qui récupère d'une malnutrition protidique

234 D. Brdiczka, K. Gerbitz, and D. Pette: Localization and Function of External and Internal Carnitine Acetyltransferases in Mitochondria of Rat Liver and Pig Kidney

241 P. Mühlradt: Biosynthesis of *Salmonella* Lipopolysaccharide. The *in vitro* Transfer of Phosphate to the Heptose Moiety of the Core

249 M. Grenson: The Utilization of Exogenous Pyrimidines and the Recycling of Uridine-5′-Phosphate Derivatives in *Saccharomyces cerevisiae*, as Studied by Means of Mutants Affected in Pyrimidine Uptake and Metabolism

283 M. Tuena, A. Gómez-Puyou, A. Peña, E. Chávez, and F. Sandoval: Effect of ATP on the Oxidation of Succinate in Rat Brain Mitochondria

291 F. Moran and M. P. Starr: Metabolic Regulation of Polygalacturonic Acid *trans*-Eliminase in *Erwinia*

328 A. Kröger and V. Dadák: On the Role of Quinones in Bacterial Electron Transport. The Respiratory System of *Bacillus megaterium*

390 U. Israelsson, M. Hamberg, and B. Samuelsson: Biosynthesis of 19-Hydroxy-Prostaglandin A_1

400 A. Pestaña: Dietary and Hormonal Control of Enzymes of Amino Acid Catabolism in Liver

413 R. C. Thomas, J. R. Manger, and E. J. Harris: Cation Uptake as the Basis for Production of Proton Pulses by Mitochondria at the Anaerobic-Aerobic Transition

441 J. Massoulié et F. Rieger: L'acétylcholinestérase des organes électriques de Poissons (torpille et gymnote); complexes membranaires

456 P. Eneroth, J.-Å. Gustafsson, and E. Nyström: Steroids in Newborns and Infants. Identification of 24,25-Dihydro-$\Delta^{9(11)}$-Lanosterol and 4α, 14α-Dimethyl Substituted Sterols among the Esterified and Free Sterols in Human Meconium

465 M. Erecińska, H. Sierakowska, and D. Shugar: Intracellular Localization of Phosphodiesterases I and II in Rat Liver

499 W. Merlevede, J. Goris, and C. De Brandt: Interconversion *in vitro* of Two Forms of Liver Phosphorylase Phosphatase

541 U. Till, D. Brox, and H. Frunder: Orthophosphate Turnover in the Extracellular and Intracellular Space of Mouse Liver

549 D. Zahn, R. Klinger, and H. Frunder: Enzymic Flux Rates within the Mononucleotides of the Mouse Liver

576 M. H. Cake and I. T. Oliver: The Activation of Phosphorylase in Neonatal Rat Liver

582 K. J. I. Thorne and D.C. Barker: Bactoprenol, ATPase and Acetate Activating Enzymes of a Vesicular Fraction from *Lactobacillus casei*

Natural Products

353 M. Berst, C. G. Hellerqvist, B. Lindberg, O. Lüderitz, S. Svensson, and O. Westphal: Structural Investigations on T1 Lipopolysaccharides

364 D. Charon, R. S. Sarfati, D. R. Strobach, and L. Szabó: Chemical Synthesis and Quantitative Estimation of 3-Deoxy D-*manno*-Octulosonic Acid

Immunochemistry

28 I. Patramani, K. Katsiri, E. Pistevou, T. Kalogerakos, M. Pavlatos, and A. E. Evangelopoulos: Glutamic-Aspartic Transaminase — Antitransaminase Interaction: A Method for Antienzyme Purification

160 C. Nauciel, J. Blass, R. Mangalo, and M. Raynaud: Evidence for Two Molecular Forms of Streptococcal Erythrogenic Toxin. Conversion to a Single Form by 2-Mercaptoethanol

165 F. Franěk, and J. Novotný: Isolation of a Disulfide Bridge Containing Fragment of the Variable Part of Pig Immunoglobulin λ-Chains

370 G. M. de Vries, M. Lanckman, and R. Hamers: Separation of Two Types of Light Polypeptide Chains from Rabbit γ-Globulins

376 A. C. Olson, G. Schmidt, and K. Jann: Biochemistry of the K Antigens of *Escherichia coli*. Formation of the Nucleoside Diphosphate Sugar Precursors of the K 27 Antigen of *E. coli* 08 : K 27(A) : H⁻

554 D. A. R. Simmons: The Immunochemistry of *Shigella flexneri* O-Antigens. The Structure and Biosynthesis of the O-Specific Side Chains of Some Representative Serotypes
